

PROFIL

Information Systems graduate (S.Kom) from President University specializing in Data Science, GPA 3.76/4.00. Experienced in building predictive and recommendation systems based on machine learning, designing optimized database schemas, and translating complex data into informative dashboards using Power BI and Looker Studio. Background in procurement administration and data management from PLN Suku Cadang, along with experience in strategic business planning and product costing monitoring and Sales, Order and Backlog of Month Monitoring at PT Omron Manufacturing of Indonesia.

EDUCATION

PRESIDENT UNIVERSITY

Bachelor of Science in Computing (S.Kom) - Information Systems

June 2023 – August 2026

GPA 3.76 / 4.00, Sep 2023 – August 2026

Awardee of Jababeka Scholarship 75%

SMA SWASTA BINTANG TIMUR 1 BALIGE

Balige, North Sumatera

June 2020-June 2023

PROFESSIONAL EXPERIENCE

- **Strategic Business Planning Internship**

PT OMRON MANUFACTURING OF INDONESIA

Jun 2026 – Sept 2026

- Built and managed two primary Power BI dashboards: one for monitoring product costing and profitability, and another for tracking sales, orders, and backlog of month.
- Performed data calculations and validation in Excel to cross-check figures against Power BI, ensuring reporting accuracy and reliable performance metrics.
- Developed interactive data visualizations of production costs, sales performance, and profit margins to support strategic decision-making for the business planning team.

- **Procurement Internship**

PT PLN SUKU CADANG

Sept 2025 – Apr 2026

- Digitized and archived over 100+ procurement contracts between PLNSC and vendors, ensuring a secure and organized digital database.
- Verified document completeness and updated vendor transaction data in the system with high precision to maintain data integrity.
- Monitored procurement processes by compiling routine reports and streamlining document flow through effective coordination with PICs.
- Represented the team at the Electricity Connect Exhibition 2025 to gain insights into power plant spare parts and strengthen supplier partner relationships.

PROJECTS

- **Digital Corporate Culture Management System — PT Pegadaian (Capstone)**

Data Science 2

Dec 2025 – Aug 2026

- Developed a web-based corporate culture management system for PT Pegadaian (Django), used to track employee participation and engagement.
- Built the AI chatbot (Digi) with RAG and a recommendation engine to personalize content for employees.
- Implemented the forgot-password admin module
- Successfully defended the capstone project at the final examination (August 2026) and completed all requested revisions.

- **Final Project Data Science | Programmer**

May 2025

- Developed a web-based predictive analytics system using Random Forest to identify students requiring academic intervention.
- Integrated a PostgreSQL database with a Django-based interface to analyze student engagement and academic clustering.
- Designed interactive data visualizations to provide insights into student performance trends.

- **Student Recommendation Concentration** | Project Manager Jun 2025 – Augst 2025.
 - Led a cross-functional team to build a Machine Learning recommendation engine for academic concentration selection based on student interests and GPA.
 - Managed the end-to-end development lifecycle, including task allocation, system testing, and authentication module integration.
 - Ensured 100% system reliability through rigorous testing of prediction modules.

CERTIFICATE

- Digital Classroom Practical Data Science – Amazon Web Services
- Machine Learning – Amazon Web Services

SKILLS

Technical Skills:

- Programming: Python, PHP, Java, JavaScript
- Data Analysis: Pandas, NumPy, Scikit-learn, Power BI, Excel, Looker Studio
- Database: MySQL, PostgreSQL
- Tools: Jupyter Notebook, pgAdmin, Django, VS Code, Xampp

Soft Skills:

- Analytical Thinking, Problem Solving, Teamwork, Time Management, Document Controller

Language:

- Indonesia(Native), English(Intermediate)
